

Rating: **A**
Outlook: **stable**
Watch: **negative watch**

Rating Committee: 12/05/2024

Strengths/Opportunities:

- Solid capital situation
- Shareholder with high support ability
- Strategy well implemented, SHBE is an essential strategic link to Europe for Shinhan Bank Korea
- Good portfolio quality, no individual value adjustments were recognized in the financial statements
- Comfortable liquidity situation, manageable refinancing risks

Weaknesses/Threats:

- Concentration of size and industry (automotive, electronics) evident in the loan portfolio
- Supply chain and resource problems cannot be ruled out

CC / C	inadequate financial standing
D	moratorium / insolvency proceedings

Press release

SHINHAN BANK EUROPE GmbH

Rating result:

The financial standing of SHINHAN BANK EUROPE GmbH (hereinafter "SHBE") continues to be assessed as high based on the information available at the time of the rating. As of the date of the rating committee, GBB rating confirms the rating with A due to a further improved earnings situation with a convincing shareholder background. The outlook is stable. Against the backdrop of the national crisis in South Korea caused by the temporary declaration of martial law, the watch status is set to negative.

Business model:

SHBE focusses in cross-border business with South Korea and forms an integral part of the group strategy, which is characterized by the pillars core of financial business, creative finance and virtuous cycle of shared prosperity. Due to SHBE's business model, interest income is the main earnings driver, which has increased further in 2024 and underlines the sustainable viability of the business strategy.

Rating drivers:

A further increase of the earnings drivers as shown in the planning with moderately increasing costs as well as a risk profile that remains unremarkable in the future would further stabilize the rating at the level achieved. The growth in lending business would have a significant contribution to this. Increasing competition between Korean banks in Germany could have a limiting effect. In addition, supply chain and resource problems cannot be ruled out, however, there is no evidence of this. SHBE currently shows no evidence of a reduction in the value of receivables from debtors affected by the interruption of supply chains or the shortage of energy or the increase of energy prices. Strains on the shareholder impacting its financial standing would also have a dampening effect on the rating result.
